Art Unit: 1625

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-40 are rejected under 35 U.S.C.112 first paragraph as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains to make/and or use the invention.

The invention appears to employ the novel strains *Pseudomonas cichorii* H45, *Pseudomonas cichorii* YN2 and *Pseudomonas jessenii* P161 to obtain specific polyalkanoates. The written description of that strain and the method of isolating it is insufficiently reproducible. Therefore, a deposit for patent purposes is required. The specification discloses at p. 41 that the strains were deposited under Budapest Treaty conditions.

For compliance with the rule, it must be averred that deposited material has been accepted for deposit under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the purpose of Patent Procedure (e.g. see 961 OG21, 1977) and that all restrictions on the availability to the public of the material will be irrevocably removed upon the granting of a patent. MPEP 2403.

Additionally, the deposit must be referred to in the body of the specification and be identified by deposit (accession) number, date of deposit, name and address of the depository and the complete taxonomic description.
